

Copy to Pasteboard

Copy the image of the png file in the file storage location of Password Maker to the pasteboard.

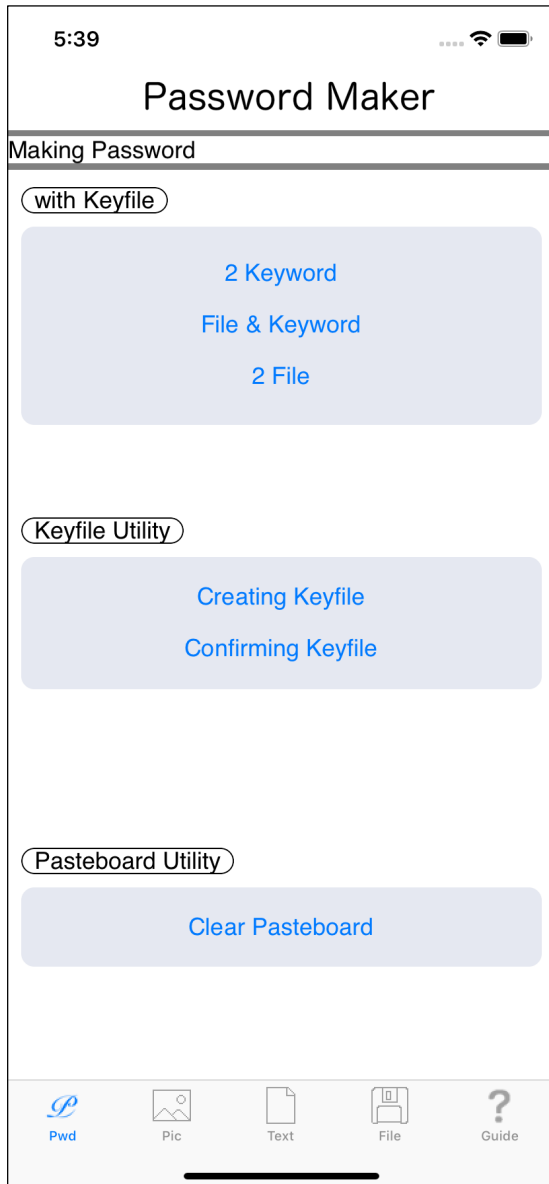

The main "Copy to Pasteboard" button in this part brings up the right view.

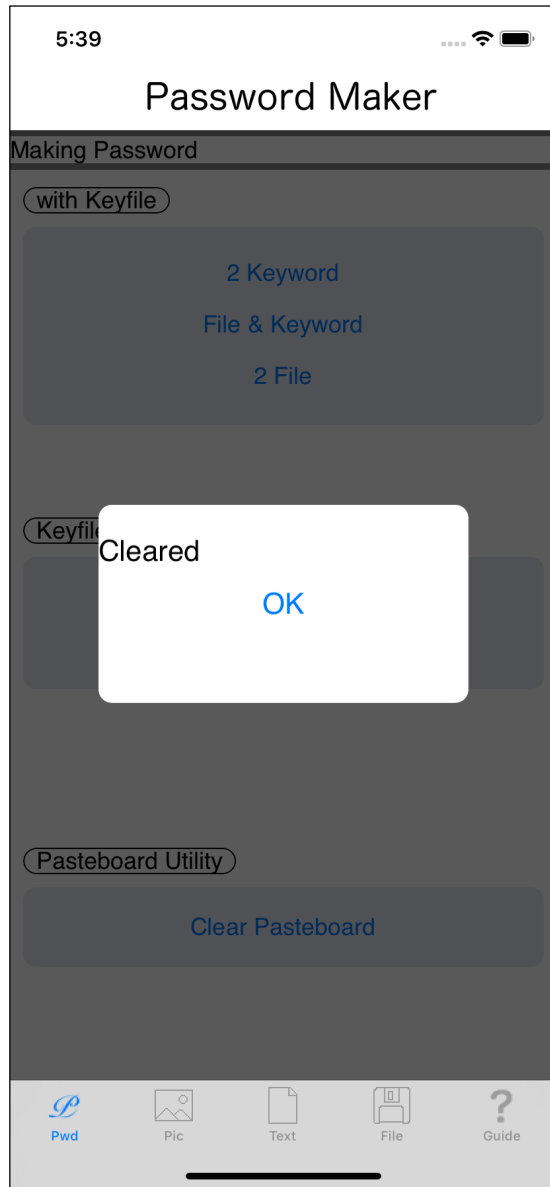

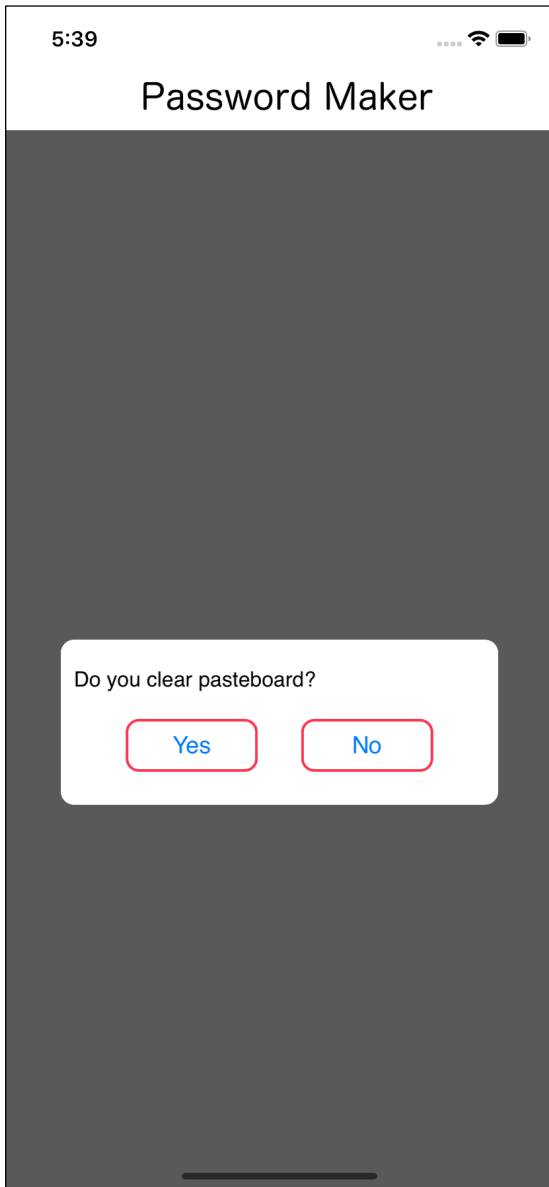

After that, press the transition arrow on the right of the png file you want to copy to display the image.

When you press the "[DoCopyToPasteboard]" button on the toolbar of this image display view, the displayed image is copied to the pasteboard.

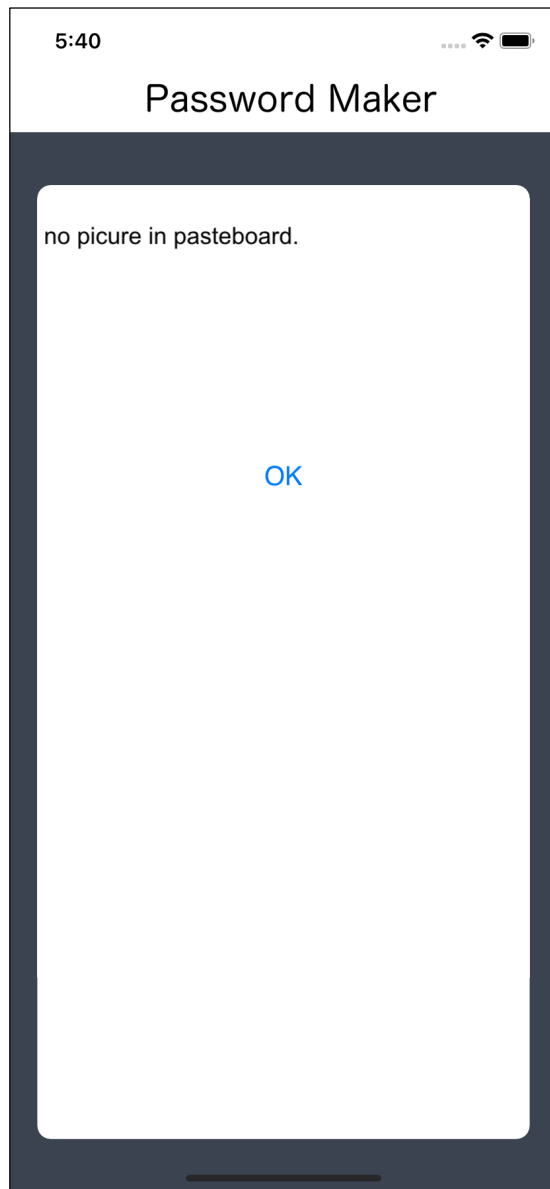

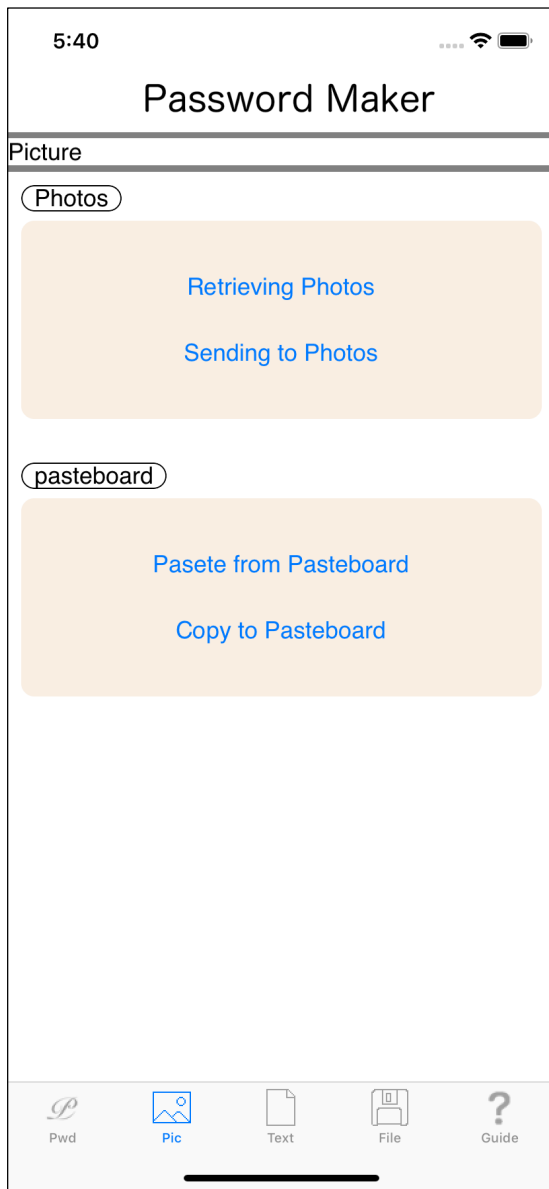

To clear the image pasted on the pasteboard from the pasteboard, use “Clear Pasteboard” as follows.

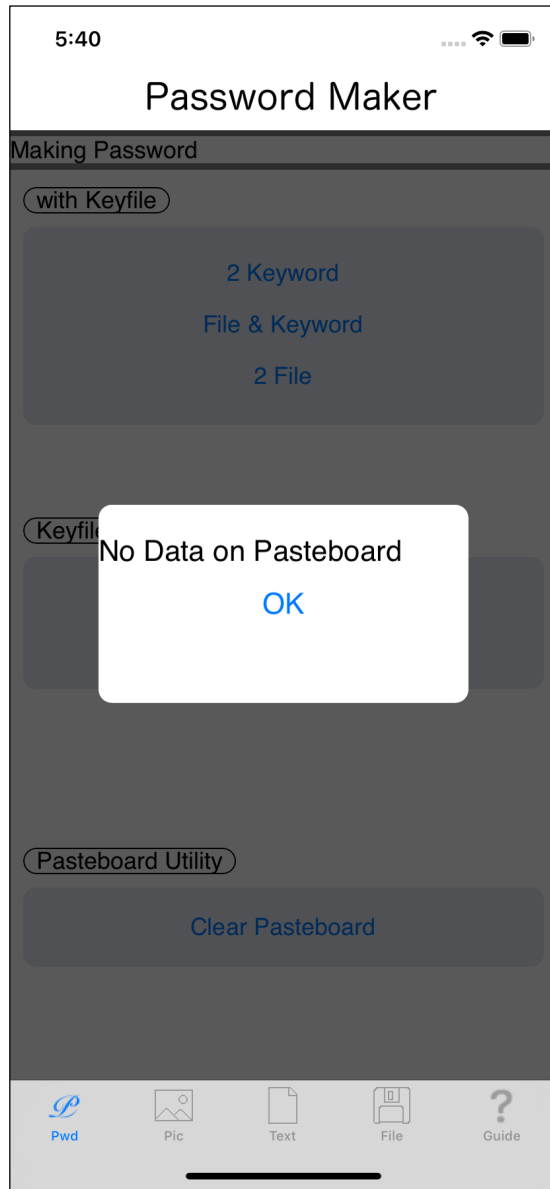

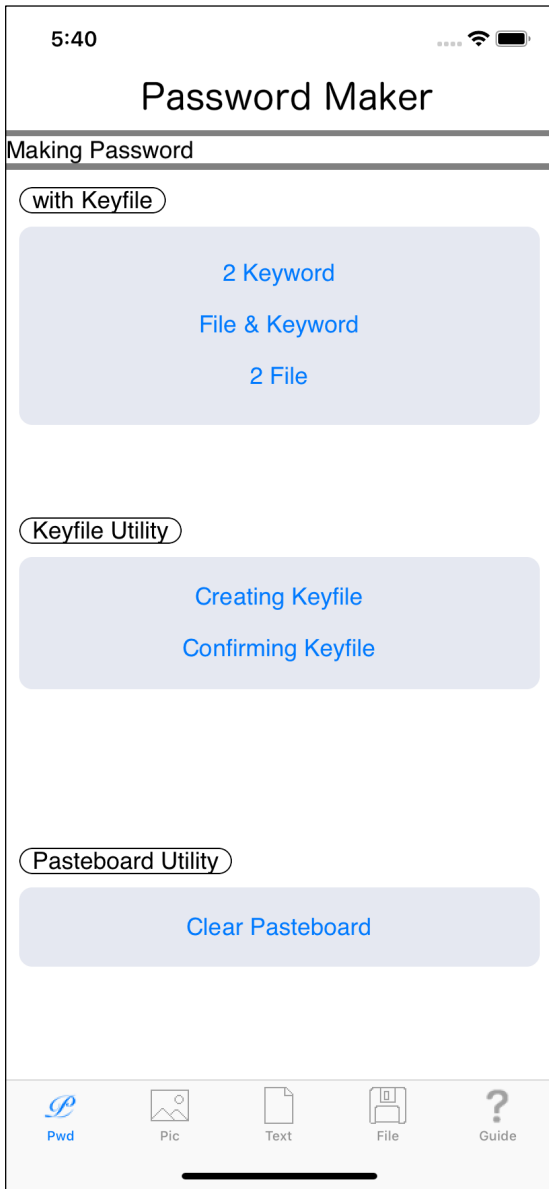

When you press the “Clear Pasteboard” button, you will see a confirmation view like the one on the left.

If you press the “Yes” button, the pasteboard is cleared and its post-report view comes out.

If you clear the pasteboard and press the “Paste from Pasteboard” button, you will see that there is no image on the pasteboard like this.

Also, if there is no image on the pasteboard, pressing the "Clear Pasteboard" button will display this message.
