

# Sending to Photos

This command sends the images stored in the file storage location of Secret Share to Photos.

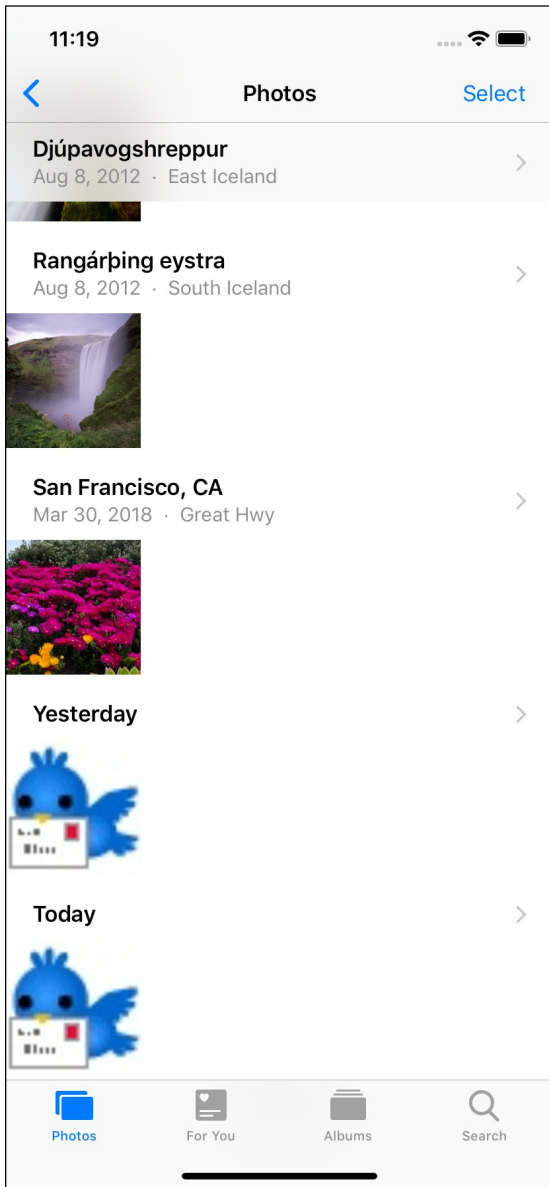

The main "Sending to Photos" button brings up a table view of the file list as below.

Press the transition arrow of this table view, and the image display view comes out as shown below.

When you press the "DoSendingToPhotos" button on the toolbar of this image display view, the displayed image is transferred to Photos.

Also, in the case of the first access to Photos, you will receive a confirmation message as shown on the right.

Looking at Photos, it looks like this.
