

# Sending to Photos

This command sends the images stored in the file storage location of QR Ware to Photos.

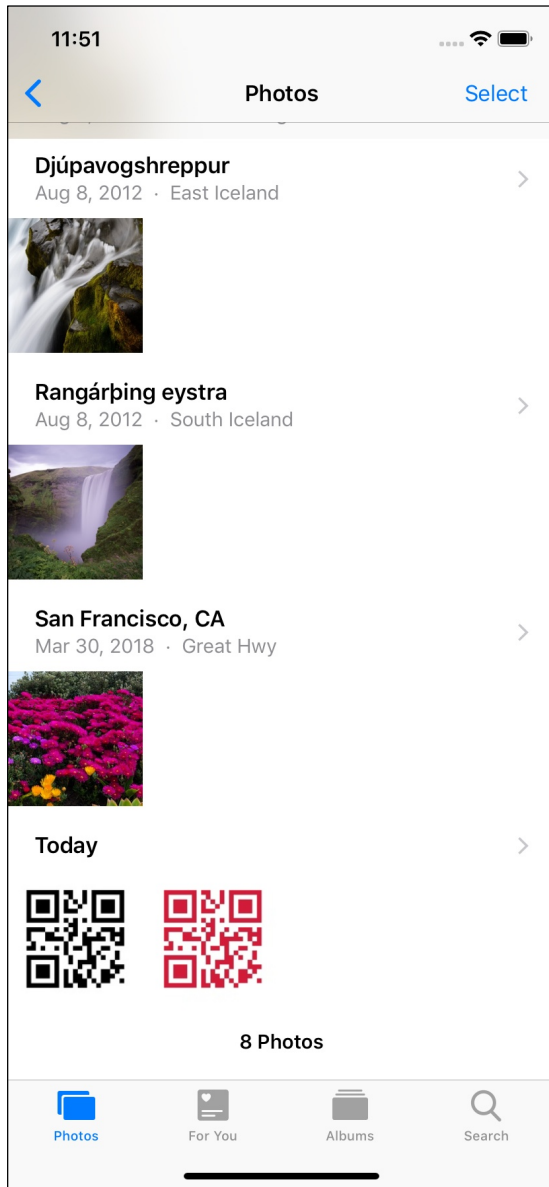

The main "Sending to Photos" button brings up a table view of the file list as below.

Press the transition arrow of this table view, and the image display view comes out as shown below.

When you press the “DoSendingToPhotos” button on the toolbar of this image display view, the displayed image is transferred to Photos.

Looking at Photos, it looks like this.
