

## Introduction - About the absence of files

gcmc performs file encryption and decryption.

If there are no files in gcmc's file storage location, on such commands, many commands will only produce such a message.

Create text file with text input command.

Use the image import command to file the image.

Transfer files from other applications to gcmc.

If you do such a thing, so that

“There is one file in the file storage location at least.”

it will work normally.

If you forget it, you may only think that the software is malfunctioning.
