

Copy to Pasteboard

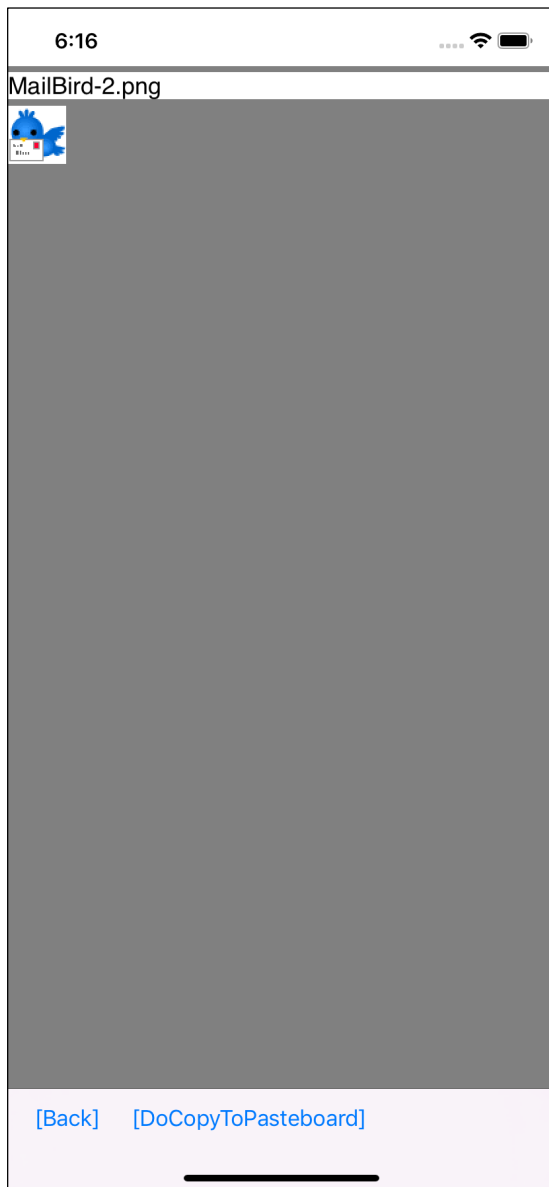

Copy the image stored in the gcmc file storage location to the pasteboard.

Press the main "Copy to Pasteboard" button and you will see the table view below.

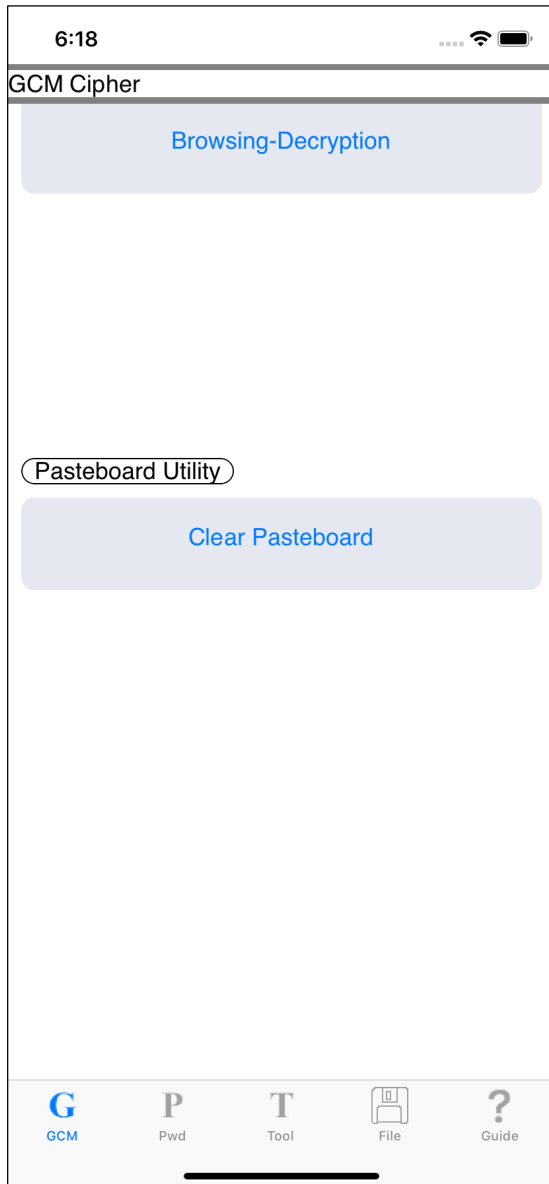

Press the transition arrow of this table view, and the image display view comes out as shown below.

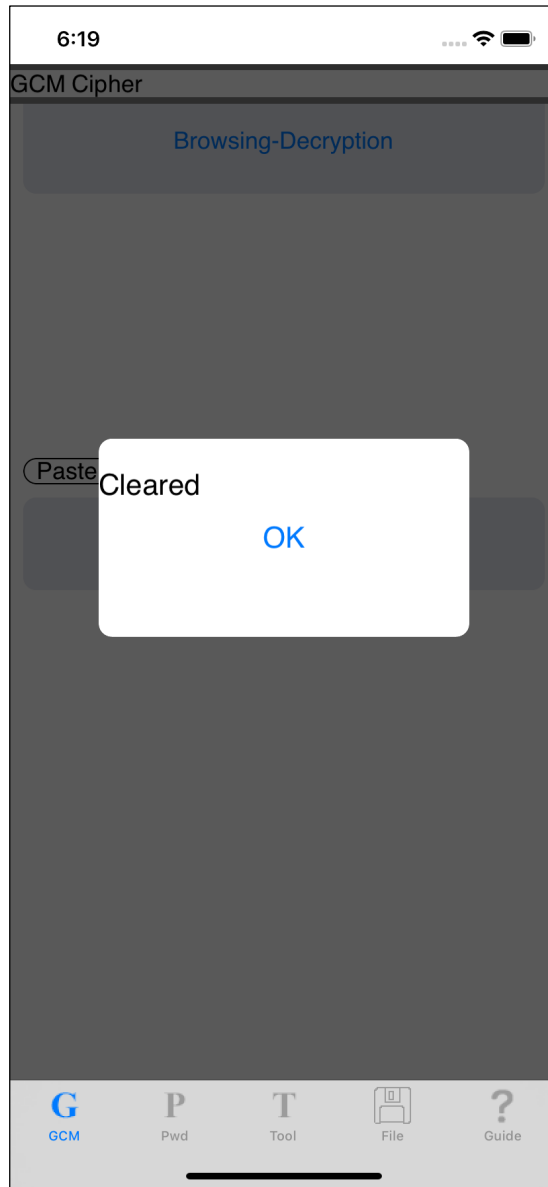

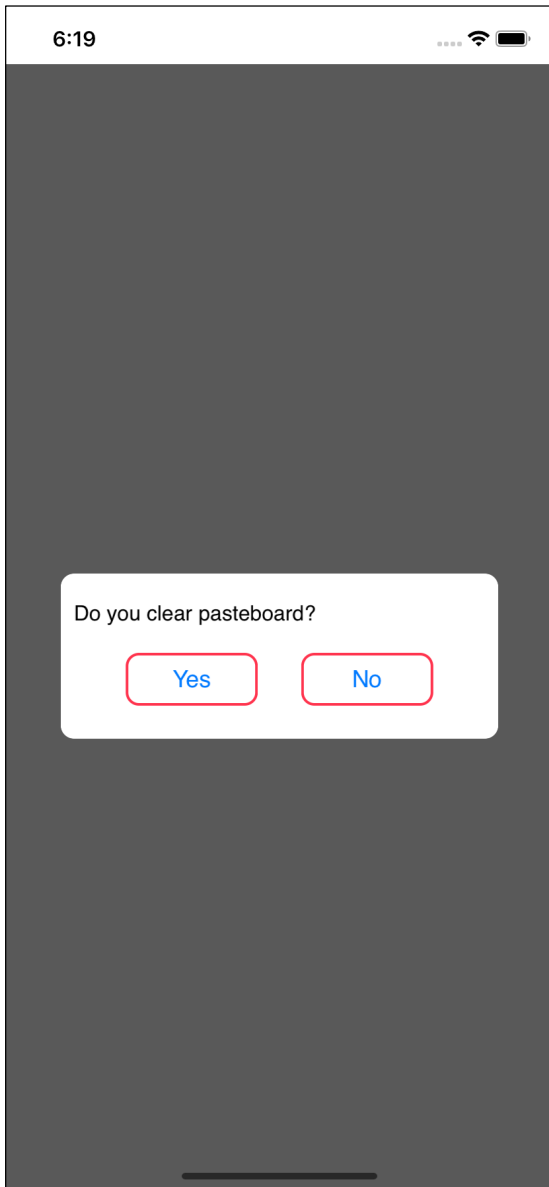

Press the “DoCopyToPaseteboard” button on this image display view to copy the displayed image to the pasteboard.

Here, post-report messages such as "copied" are not issued.

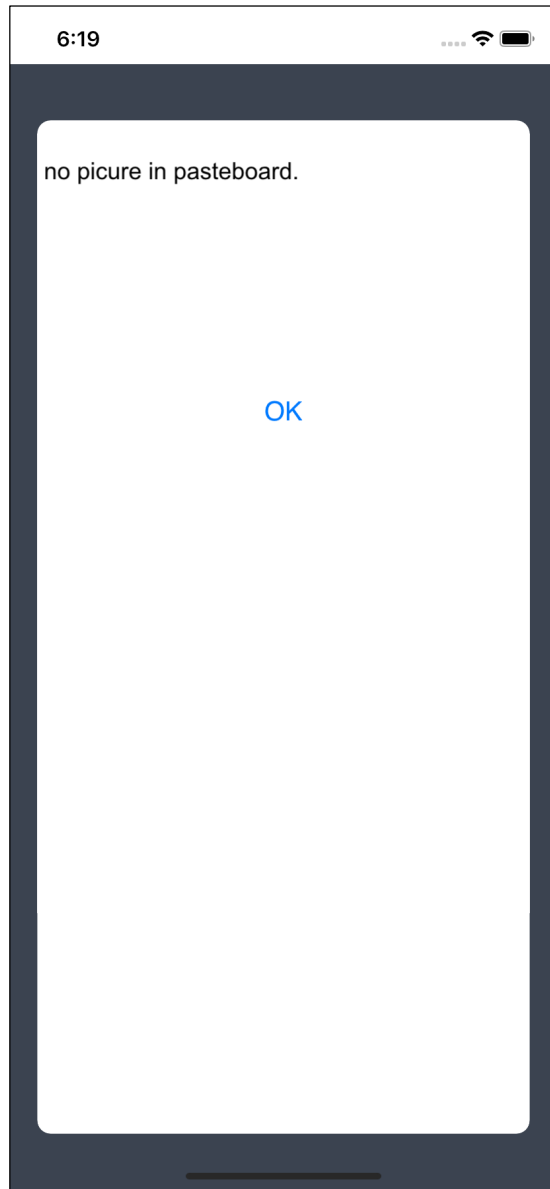

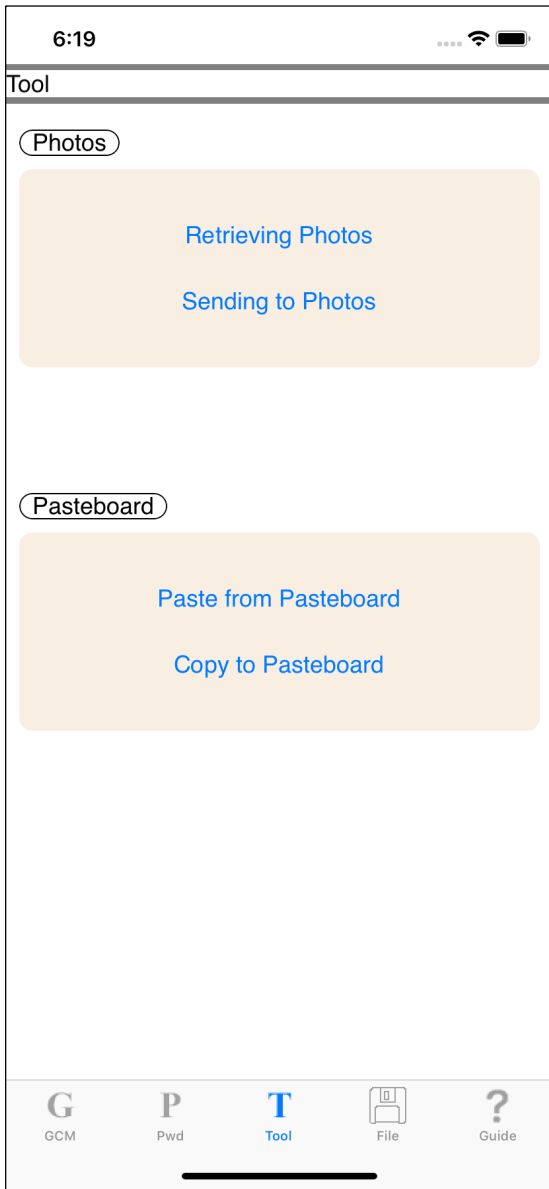

To clear the image pasted on the pasteboard from the pasteboard, use "Clear Pasteboard" as shown below.

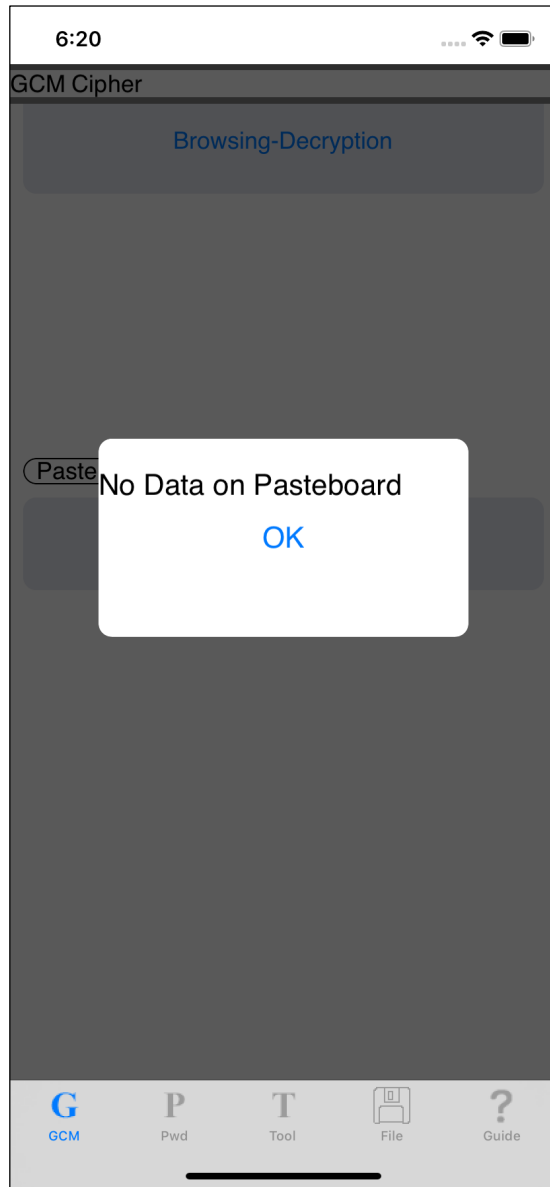

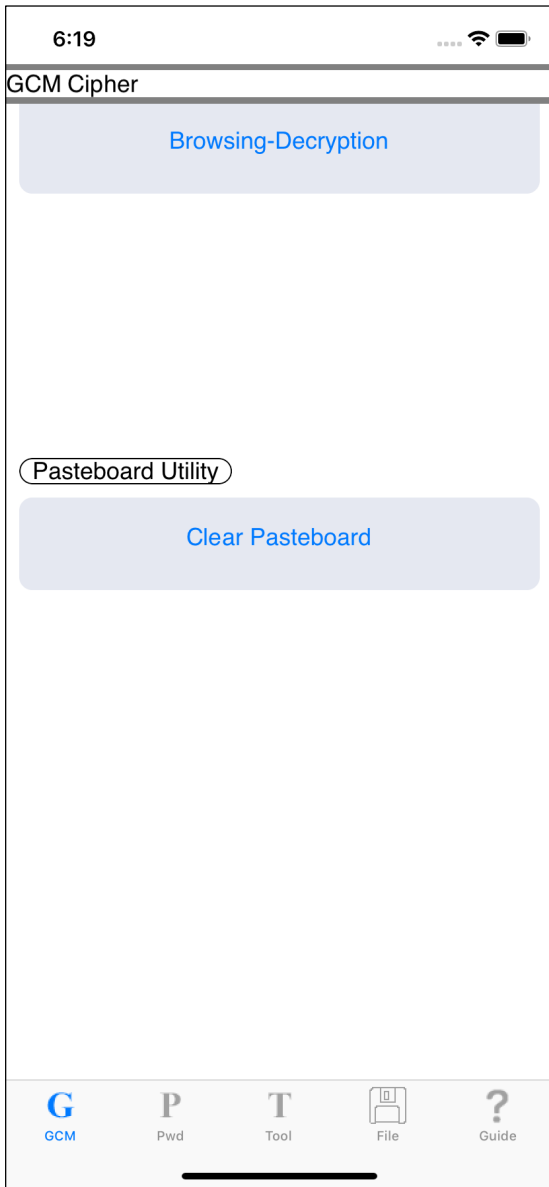

When you press the “Clear Pasteboard” button, you will see a confirmation view like the one on the left.

When the "Yes" button is pressed, the pasteboard is cleared and its post-report view comes out.

If you clear the pasteboard and press the "Paste from Pasteboard" button, you will see that there is no image on the pasteboard like this.

Also, if there is no image on the pasteboard, pressing the "Clear Pasteboard" button will display this message.
