

File comparison

Make sure that the two files are the same.

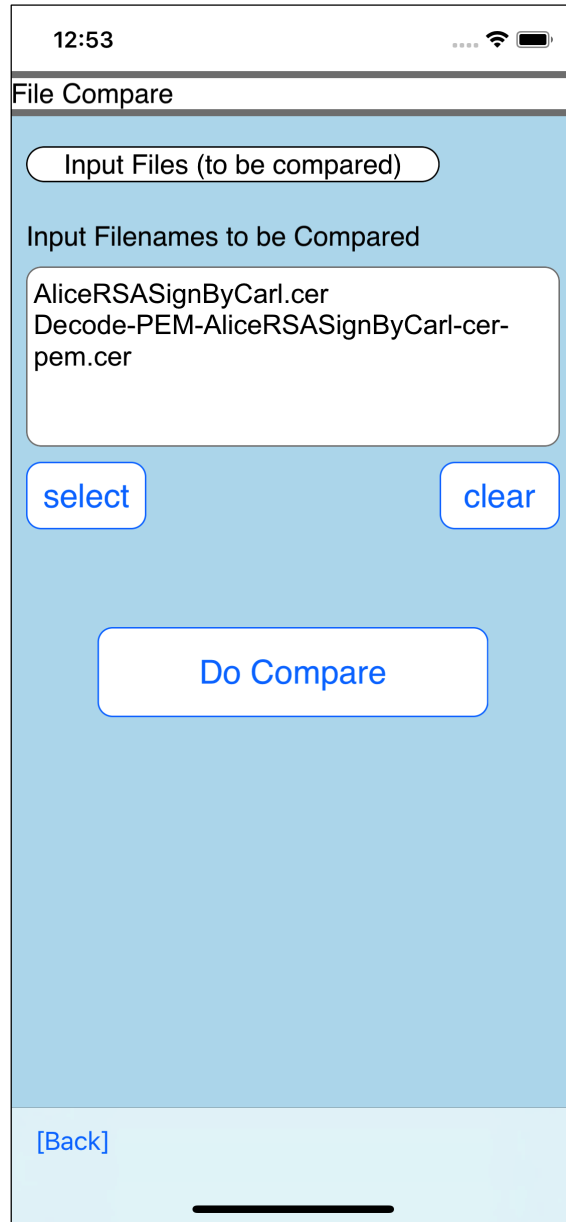

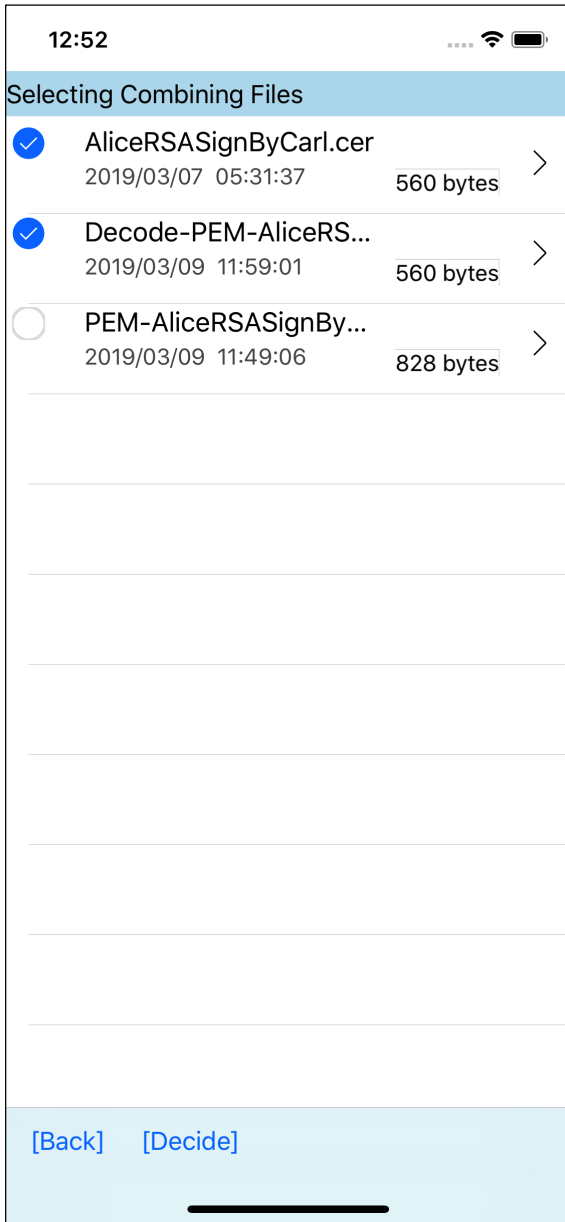

The image shows a mobile application interface for file comparison. At the top, the status bar displays the time 12:52, signal strength, Wi-Fi, and battery icons. Below the status bar is a title bar labeled "File Compare". The main content area has a light blue background and contains the following elements: a rounded rectangular button labeled "Input Files (to be compared)", a text label "Input Filenames to be Compared" above a large white text input field, two rounded rectangular buttons labeled "select" and "clear" positioned below the input field, and a larger rounded rectangular button labeled "Do Compare" centered below the "select" and "clear" buttons. At the bottom of the screen, there is a light blue bar with a "[Back]" link on the left and a black home indicator bar at the very bottom.

The user interface looks something like this.

File name of two files to be compared

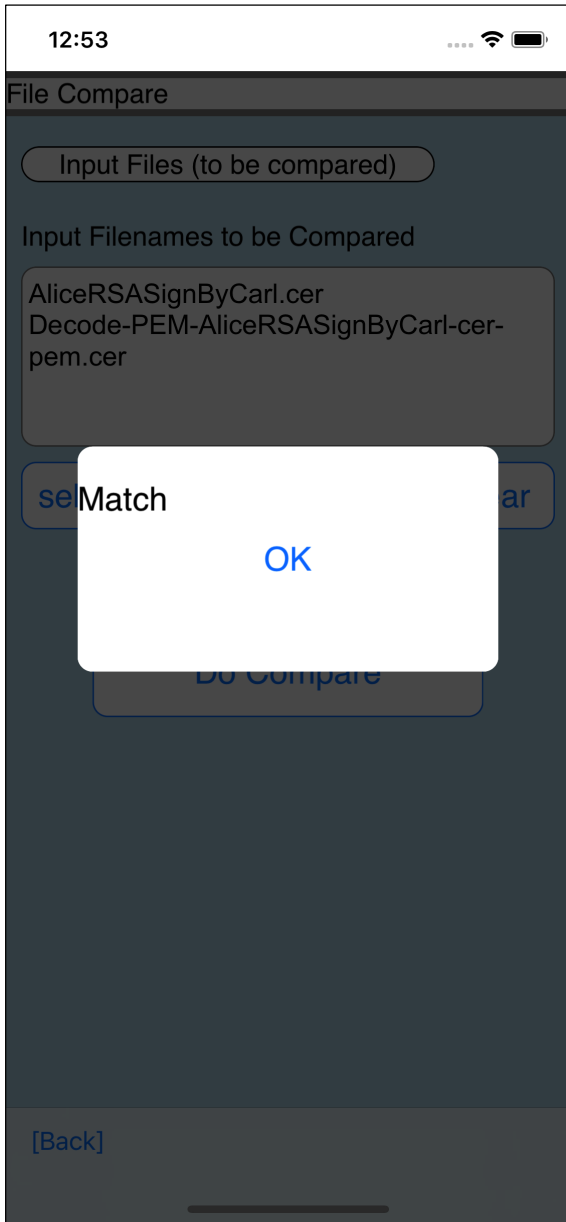

This is the meaning.

This TableView can select multiple items.

Select two files to be compared.

“Press the “Do Compare” button to compare and display the results.

If it matches, this view will be displayed.
