About how to display files

rsac can accept any type of file transferred.
Therefore, it is possible to display any kind of file.

However, files with extensions such as cer, pem, pfx etc.
can not be transferred.

However, Password Maker displays files in the following three ways:

text

png file image

Ascii Hex format

To be precise, there are three ways:

text
text file

Image
png file

32-bit RGBA format
24-bit RGB format

Ascii Hex format
Other than those above

Image files other than png files will be displayed in Ascii Hex format.
Even png files that are not in following format will be displayed in Ascii Hex format.

32-bit RGBA format

24-bit RGB format

The file type is determined by the contents of the file content.

The file name and extension do not determine the file type.
